SUMMARY

Software engineer with experience in building scalable web applications, REST APIs, and automation tools using React, Django, FastAPI, and TypeScript. Proven ability to design performant UIs, optimize backend systems, and manage full product lifecycles from idea to deployment. Skilled in modern dev workflows including CI/CD, Git, Docker, and cloud deployment.

EXPERIENCE

Frontend Developer

Mar. 2024 – Present

Agramont Worldwide Logistics

San Diego, CA

- Develop internal and client-facing tools for warehouse, yard, and truck logistics using React.js, Django REST Framework, and PostgreSQL.
- Improved API efficiency and reduced frontend data load times by optimizing state management and caching using React Query.
- Implemented reusable component libraries and Tailwind CSS utility classes to accelerate development and ensure visual consistency.
- Worked closely with logistics managers to gather requirements, iterate on features, and deploy updates using CI/CD pipelines.

Full Stack Developer

Dec. 2022 – Mar. 2024

Self-employed

San Diego, CA

- Built a Python app for Universal Robots automating live robotic data exports to Excel, reducing human error and improving traceability.
- Developed responsive websites using Next.js, integrated CMS features with WordPress, and optimized for SEO and accessibility.
- Created a fully automated e-commerce platform with Stripe payment flow, dynamic product listings from Printify, and webhook-based order tracking.
- Handled deployment and hosting managed environment configs with environment variables and ‘.env’ practices.

PROJECTS

Cartana | *Next.js, Django, FastAPI, PostgreSQL, MongoDB, Redis*

Jan. 2025 – Present

- Developed a plug-and-play SDK for tracking user behavior, cart activity, and abandonment patterns in real time.
- Used Redis queues and FastAPI background workers for scalable ingestion, reducing API latency by over 40%.
- Implemented AI models to analyze behavioral events and translate insights into clear, actionable outputs.

Fully Automated E-commerce | *MERN, Stripe, Printify API*

Oct. 2023 – Present

- Built a production-grade online store with cart persistence, admin dashboard, and live order tracking.
- Used Stripe Checkout + webhooks for seamless payment and order updates; automated product sync via Printify API.
- Focused on performance and uptime using server-side rendering, lazy and optimistic loading, and optimized static assets.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL (Postgres), HTML/CSS

Frameworks: React, Next.js Node.js, Flask, Express.js, Django, Material-UI, Tailwind, FastAPI, WordPress

Developer Tools: Git, Docker, Redis, Azure, VS Code, Visual Studio, REST APIs, CI/CD, Webhooks

Libraries: pandas, PyMongo, Axios, React Query, SWR, Zod
